

Crossing Our “T”s, Dotting Our “I”s To Assure Proper “C”alibration

Occasionally we receive calls, often frantic, from company contacts suffering through impromptu OSHA inspections. Requests for audiometer calibration records are common during Hearing Loss Prevention Program inspections.

T K Group maintains calibration records. Calibration records archived at our corporate office for safekeeping and quick retrieval in the event that they needed at any time. Calibration records include annual exhaustive calibration, daily biological calibration check documentation, and background sound levels within the test chamber.

So remember, when OSHA calls, call us. We also maintain Hearing Loss Prevention Program training documentation.
